

Moving on
is a simple thing

About us

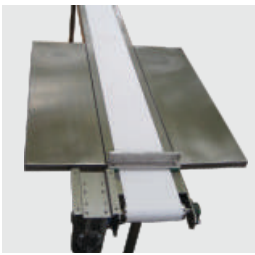

We take pleasure in introducing our self as one of the leading manufacturers of Conveyors and Power Transmission Products, with over 12 years experience in Conveyor Systems, we offer a professional and flexible build to order service.

From initial site visit to quotation and from design through production, dispatch and installation, we work closely with our customers to ensure we supply high quality machines and systems which are both fit for purpose and built to last.

Our product range includes Standard Belt Conveyors, Powered Roller Conveyors, Slat Chain Conveyors, Inclined Cleated Belt Conveyors, Modular Belt Conveyors, Truck Loading / Unloading Conveyors, Gravity Roller Conveyors, Fully Automated & PLC Controlled Conveyors and Material Handling Systems

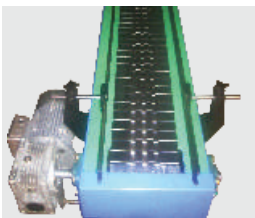

We supply conveyors to a various type of industries as sector wise including Food Processing, Pharmaceutical, Dairy, Beverage, Packaging & Labeling, Battery Production, Chemical & Fertilizers etc...

Applications

Food Grade Conveyors

The conveyors designed to use in Sanitary Environments for Food Processing, Dairy and Pharmaceuticals are complied with FDA regulations and are easy to clean and handle, it is hygienic and require low maintenance. All the conveyor components used are made of Corrosive Resistant, Antimicrobial and Food Grade materials like SS-304, UHMWPE, Polyamide, Polyurethane etc...

Acid Resistant Conveyors

The conveyors designed to use in Acidic Environments like Battery Production and Chemical Industries are highly reliable and long lasting. All the conveyor components used are made of Acid resistant and high temperature resistant materials like SS-316L, HDPE, PP, UHMWPE, Poly amide, Poly acetal etc...

General Industrial Conveyors

The conveyors designed for General Engineering applications include material handling and application specific systems. These conveyors are known for their high load bearing capacity and sturdy construction that makes them reliable in all kinds of job works

Our Specialised Products

- Belt Conveyors • Inclined Belt Conveyors • Inclined Cleated Belt Conveyors • Side Wall Cleated Belt Conveyors • Chain Conveyors • Slat Chain Conveyors • Multi row Slat Chain Conveyors • 90° Bend Slat Chain Conveyors • Rollers Conveyors • Gravity Roller Conveyors • 90° Bend Roller Conveyors
- Powerised Roller Conveyors • Loading / Unloading Conveyors • Printing Conveyors • Flexible Conveyors
- Wire Mesh Conveyors • Modular Belt Conveyor • Food Grade Conveyors • Special Purpose Conveyors & Conveying Systems like Bottling Line, Assembly Line, Sorting & Collating Lines & Packing Lines alia

Flat Belt Conveyor

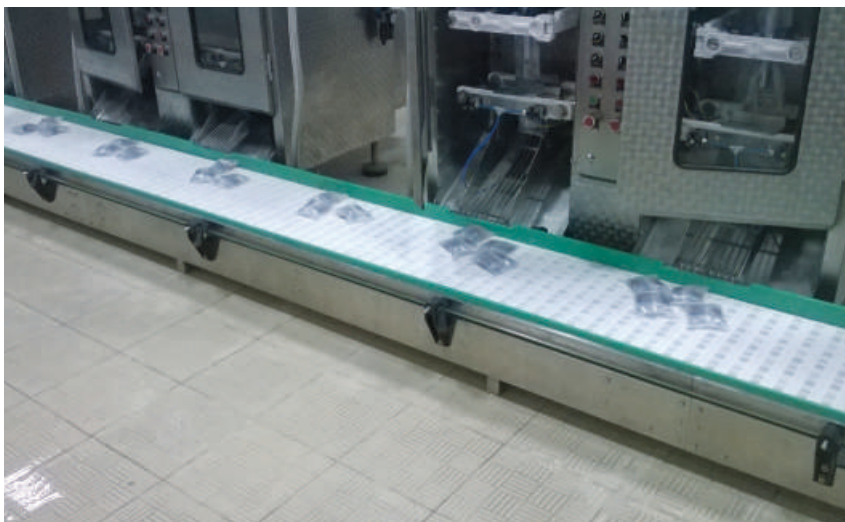

Flat Belt Conveyors are used for the controlled movement of a large variety of both regular and irregular shaped products. They can move light, fragile to heavy, rugged unit loads on a horizontal or inclined path within the limits of product stability

Types of Belts

- PVC
- PU (Food Grade)
- Rubber
- Rough-Top etc...

Truck loader Conveyor

Truck Loading Conveyor can be single stage or telescopic with rough topbelts, which can run in either direction to make it useful for loading / unloading packages into and from trucks, bags handling etc..

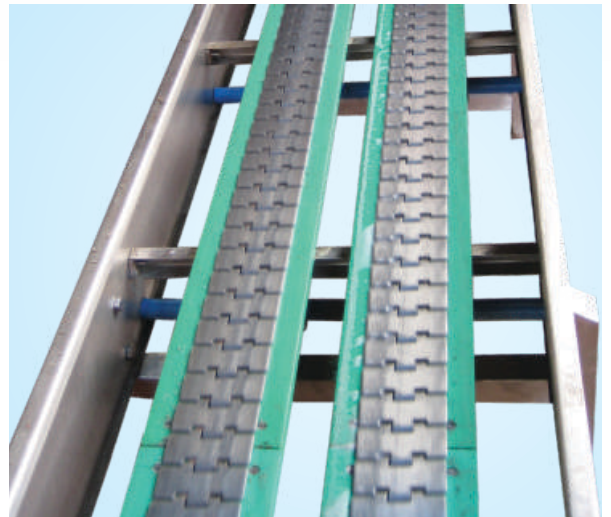

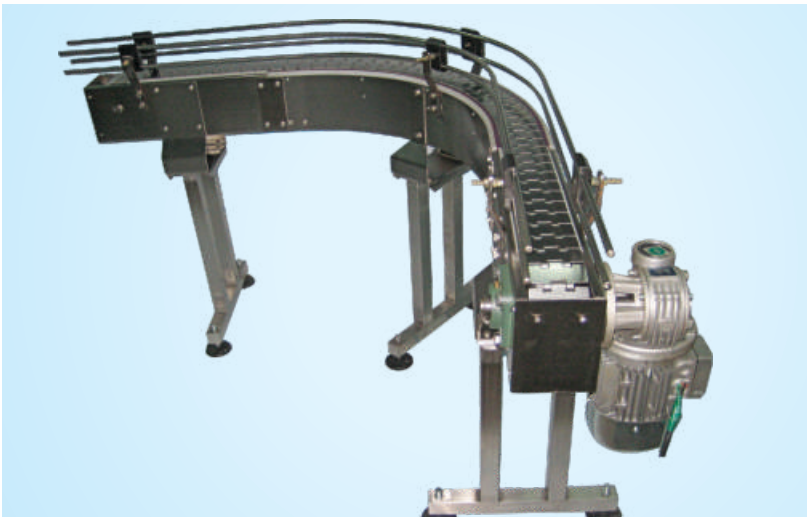

Modular Belt Conveyor

Modular Belt Conveyors can be straight running, side flexing, plain or cleated, with side guards/side wall. They can be used for Sea Food / Frozen Food, Meat / Poultry, Confectionery / Snack Food, Fruit & Vegetable, Packaging with FFS into and from trucks, bags handling etc..

Slat Chain Conveyor

Slat chain conveyors are used in high wear areas, they can be straight running or side flexing with single or multi-rows. They are widely used in applications like Beverage / Can Filling, Dairy / Food Processing, Bottling Operations, Pharmaceutical, Electronics, Packaging with Filling Machines etc...

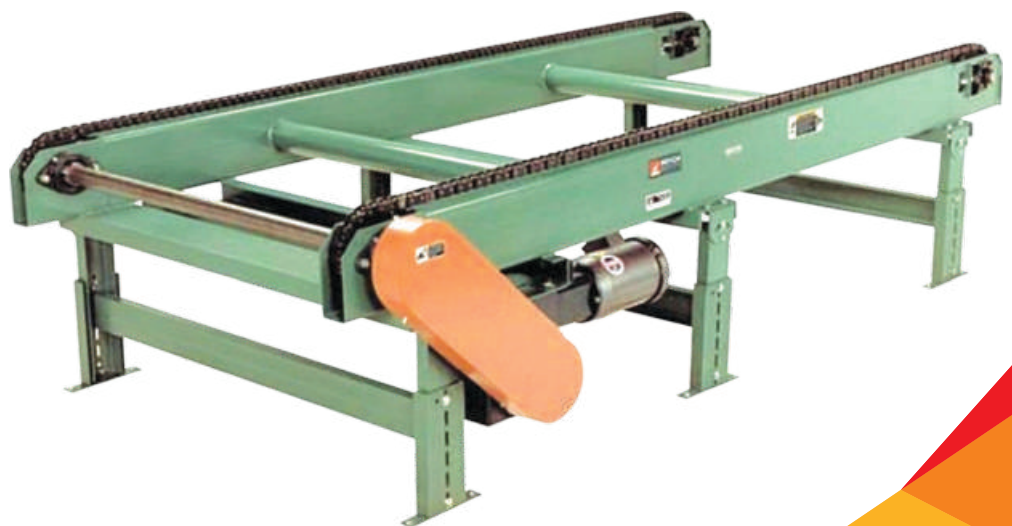

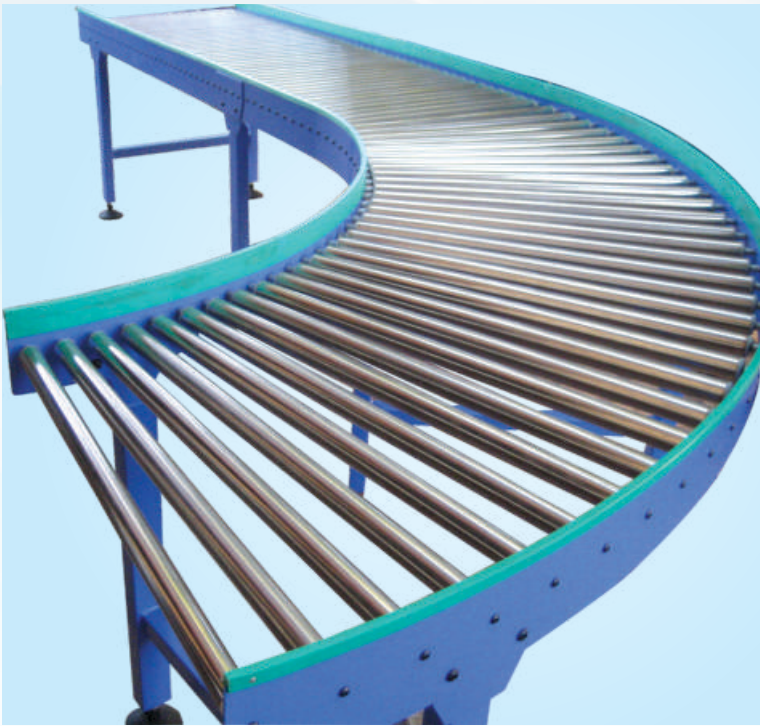

Chain Conveyor

Chain Conveyors are used to convey heavy duty unit loads like Wooden Crates, Cotton Bales etc.. and are extensively used in engineering industries and automotive sectors.

Types of Chains

Stainless Steel / Mild Steel Chains and Chains with Special attachments

Roller Conveyor

Roller Conveyor can be either Powered or Gravity / Idler (works on gravitational force). They are suitable for any industry Transporting Pallets, Carton / Corrugated Boxes, Flat Bottomed items and are used for Loading / Unloading goods and in Packaging like Flap Closing & Carton Sealing & Strapping etc...

Types of Rollers

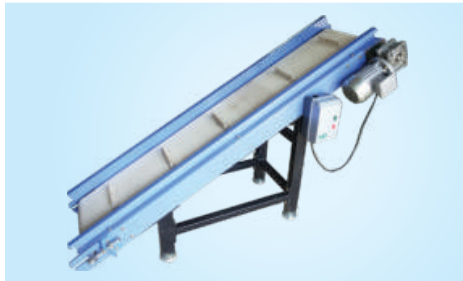

Stainless Steel, Mild Steel (chrome plated) and Plastic (PP, PVC, HDPE)

Controls & Integration

For automation of the conveyor line, logic will be developed based on the operational process. The line can be integrated with systems like Flap Closing & Carton Sealing, Strapping, Check Weighing, Labeling, Metal Detection, Coding, Filling, FFS etc...

The process can be controlled, as required by PLC, various Sensors, Counting Mechanisms, Limit Switches, Timer Relays and Code Readers etc...
